SUMMARY

As a Laravel Developer with comprehensive experience in both frontend and backend development, I am proficient in managing all phases of the software development lifecycle for dynamic web applications. My expertise spans across key technologies including HTML, CSS, Bootstrap, JavaScript, jQuery, and PHP with MySQL. I have gained 4+ years of hands-on experience at Nerdcamp under the guidance of a trainer, which has further strengthened my technical skills and practical problem-solving abilities. In addition to my technical capabilities, I bring a strong background in project management and client relations, enabling me to deliver robust, user-focused solutions while effectively collaborating with stakeholders and cross-functional teams.

EXPERIENCE

Internship | KPITBoard | Peshawer | March 2022 - August 2022

- Completed an internship focused on Laravel development, contributing to a dynamic blog project.Worked on both frontend and backend modules, including user authentication and CRUD operations.Implemented responsive UI using HTML, CSS, Bootstrap,javascript,Jquery and integrated it with Laravel Blade templates.Gained practical experience in database design, routing, and MVC architecture within Laravel.

Junior Web Developer | NerdCamp | Peshawer | August 2022 - October 2023

- Worked as a Junior Web Developer on "Jobtemp," a Qatar-based freelancing and job-matching platform.Developed and maintained core features using Laravel for backend and Blade for templating.Integrated user authentication, job postings, applications, and real-time notifications.Built intuitive dashboards for job seekers and employers to manage profiles and listings.Collaborated closely with UI/UX designers to ensure a responsive and user-friendly frontend using Bootstrap, HTML, CSS, and JavaScript.Implemented RESTful APIs for seamless data exchange between modules.Optimized database queries and ensured data integrity using MySQL.Worked in an agile environment with regular code reviews and sprint planning.Handled bug fixing, testing, and deployment to ensure smooth project delivery.Contributed to improving platform performance and user experience through continuous feedback and iteration.

- Contributed to the development of a feature-rich E-Commerce web application using Laravel.Handled both frontend and backend tasks, including product listing, cart, checkout, and order management modules.Integrated secure payment gateway APIs to support online transactions.Designed and implemented responsive UI components using Bootstrap, HTML, CSS, and JavaScript.Developed admin panel functionalities for managing products, categories, users, and reports.Optimized application performance and improved loading times through efficient database queries.Implemented user authentication, role-based access control, and password recovery features.Created custom API endpoints for mobile app integration.Conducted unit testing and debugging to ensure a smooth and error-free user experience.Collaborated with cross-functional teams to ensure timely delivery and client satisfaction.

Senior Web Developer (Team Lead) | SmartFunStudio | Lahore | November 2023 - December 2024

- Led the development of a comprehensive EMR (Electronic Medical Records) system for healthcare management.Oversaw a team of developers, assigning tasks, conducting code reviews, and ensuring adherence to best practices.Designed and implemented secure modules for patient records, appointments, prescriptions, billing, and reporting.Integrated role-based access control for doctors, nurses, and administrative staff.Used Laravel for backend development and React.js for building dynamic and responsive frontend interfaces.Implemented data encryption, audit logging, and HIPAA-compliant practices to protect sensitive medical data.Collaborated with healthcare professionals to gather requirements and ensure real-world applicability.Developed RESTful APIs for third-party system integrations and mobile applications.Monitored application performance and optimized database queries for high-volume usage.Ensured timely project delivery through agile methodologies, sprint planning, and daily stand-ups.

- Worked on AwoxAgenda, a multifunctional content processing platform.Developed modules to split videos into multiple segments and convert them into audio files.Implemented audio-to-text transcription functionality using external APIs and built-in processing tools.Designed features to convert HTML content to PDF and vice versa, ensuring format accuracy and consistency.Used Laravel for backend logic and React.js for a responsive and interactive user interface.Handled complex file processing workflows and optimized performance for large media and document files.
  Integrated progress tracking and status updates for long-running tasks to enhance user experience.Ensured cross-format compatibility and handled edge cases during file conversions.Collaborated with the team to test, debug, and deploy robust media processing pipelines.Focused on automation, accuracy, and scalability throughout the project lifecycle.

- Worked on YEC, a digital platform designed for youth empowerment and community engagement.Developed key features such as user registration, login, profile management, and content sharing using Laravel and React.js.Implemented interactive modules including news feeds, events, and user discussions to foster engagement.Integrated media upload functionality for images and documents with moderation workflows. Built role-based dashboards for admins, mentors, and users with tailored access and features.Ensured responsive design using Bootstrap and optimized frontend performance.Developed secure APIs and handled authentication using Laravel Sanctum.Collaborated closely with designers and stakeholders to align features with platform goals.Conducted testing, debugging, and deployment in a collaborative agile environment.

Senior Web Developer (Team Lead) | Techexa | Islamabad | January 2025 - Current Start

- Serving as Senior Web Developer (Team Lead) at Techexa, overseeing the design and development of an advanced HRM (Human Resource Management) System tailored for a UK-based organization.Led a team of developers, assigning tasks, managing sprints, and conducting code reviews to ensure high-quality output.Designed the system architecture using Laravel for backend and React.js for the frontend interface.Developed core HR modules including employee management, payroll, leave tracking, and performance evaluations.Integrated a dynamic Rota (shift scheduling) system to manage rotating staff schedules with real-time adjustments.Built a responsive admin dashboard with role-based access for HR managers, department heads, and employees.Implemented secure login, multi-user permissions, and encrypted data storage to comply with UK data protection laws.Automated payroll generation with tax calculations, overtime tracking, and payslip downloads.Created custom forms for onboarding, exit processes, and internal communications.Integrated notification systems for rota changes, approvals, and HR announcements.Implemented an employee self-service portal for managing personal details, time-off requests, and document

access.Developed advanced reporting tools with export options (PDF, Excel) for attendance, payroll, and compliance.Integrated third-party APIs for identity verification, holiday calendars, and SMS/email alerts.Built RESTful APIs to support mobile app connectivity and third-party integrations.Used Bootstrap and Tailwind CSS to design a modern, mobile-responsive interface.
Optimized complex SQL queries for real-time data handling and minimized server load.Handled deployment, CI/CD pipelines, and version control using Git and GitHub Actions.Coordinated closely with UK-based clients to gather requirements, present demos, and implement feedback.Ensured GDPR compliance, audit logging, and user data privacy throughout the system.Delivered the system within deadlines while ensuring scalability for future enterprise use.

Bootbell CRM – Custom Development & Integrations:

- I integrated the PayPal payment gateway to enable secure online transactions within the CRM. I implemented the Unsplash API to fetch and manage dynamic images in the system. I added multiple new features based on evolving business requirements. I extensively customized and enhanced existing CRM modules to meet client needs. I also improved overall system usability, performance, and workflow efficiency.

Casino Spin Wheel Game – Game Development Project:

- Developed an interactive casino-style Spin Wheel game with smooth animations and real-time user interaction.Integrated Stripe payment gateway to handle secure deposits and in-game transactions.
  Implemented fair and reliable randomization logic to ensure unpredictable spin outcomes.
  Designed a responsive and engaging user interface for an enhanced player experience.
  Built backend logic to manage game rules, rewards, transactions, and result validation.
  Optimized system performance to ensure smooth gameplay and fast processing.

WebSparkduilders:

- WebSpark Builders is an AI-powered no-code website development platform that enables users to create professional, responsive websites without technical expertise. The platform leverages artificial intelligence to generate layouts, content, and visuals efficiently. It offers a user-friendly drag-and-drop editor with customizable templates for various industries. WebSpark Builders helps businesses launch websites faster while reducing development costs. It is ideal for startups, freelancers, and small to medium-sized businesses seeking scalable digital solutions.

EDUCATION

Master's degree in Software Engineering | Abasyn University |Peshawar | 2022(Pending)

Bachelor's degree in Software Engineering |Sarhad University | Peshawar | 2020

SKILLS

Front-end: React, J Query,JavaScript, HTML, CSS,Bootstrap,Shopify.

Back-end: PHP,Laravel,MySQL DBs, SQL § Data Analytic: Elastic Search,Micro service API s , GitHub,High-charts.
